ComSys Helps Businesses Deduct Up to \$1M on Qualifying Equipment Expenses

Leading Managed Technology Services Points Out Section 179 Tax Benefit to SMBs

GAINESVILLE, FL – October 2020 - ComSys a leading managed technology services provider (MTSP), announced today that it is helping customers take advantage of a substantial tax deduction, outlined by guidance issued from the IRS, also known as Section 179. Section 179 allows businesses to completely deduct the purchase price of qualifying equipment and/or software purchased or leased during the 2020 tax year. However, the technology or equipment must be operational by the end of the calendar year, December 31, 2020, and with the deadline fast-approaching businesses must leverage its benefits quickly.

ComSys is advising its clients about this tax-benefit in order to help businesses cope with the unforeseen and often sizable expenses the pandemic has forced upon them. This comes at a time when many small to mid-sized businesses (SMBs) are searching for ways to restructure their operations to accommodate for remote workplaces, work-from-home scenarios and/or hybrid-offices, and have discovered how important security is to make this transition happen. As business owners have done their best to

comply with mandatory work-from-home policies, there are often significant costs in making these transitions work. ComSys is doing its part to keep the business community informed on how they can reduce their tax liability and weather the storm.

“Small and mid-sized businesses have taken the brunt of this pandemic,” stated Donald Bugos, President of ComSys. “Section 179 is too good of a deal to ignore. It’s a huge discount. If a business is restructuring itself or making an investment in technology or software, they need to know about this exemption.”

Section 179 is affording businesses a golden opportunity to reposition themselves for success, by making investments much more feasible than ever before. The IRS is firmly behind this incentive and has even expanded the maximum expense deduction in the recent years, “For tax years beginning after 2017, the Tax Cuts and Jobs Act (TCJA) increased the maximum Section 179 expense deduction from \$500,000 to \$1 million.” (IRS.gov)

As businesses have been confronted with mandates to operate remotely, Section 179 offers a much-needed tax-break to make this transition financially possible. The TCJA also amended the definition of “qualified real

property” to mean qualified improvement property and some improvements to nonresidential real property, including roofs; heating, ventilation and air-conditioning property; fire protection and alarm systems; and security systems.

As a provider of various security-based technologies, ComSys is thrilled that businesses can more easily access the security tools they need making their teams more productive and secure as they work from home, and with the assistance of a government subsidy, business owners don’t have to do it all alone. For example, let’s assume that a business owner wants to invest \$125,000 back into their company through qualifying expenses. In the first year, they can deduct the entire \$125,000. This means that effectively they would save \$43,750 (assuming a 35% tax bracket) on those expenses. This would drive the net cost of the new equipment down to \$81,250. Regardless of which equipment the business invests in, Section 179 is a phenomenal program that should not be wasted.

ABOUT COMSYS

The history of Communication Systems, Inc. (dba ComSys) dates back to 1981.

The company is North Central Florida's most customer-oriented business technology solutions company - providing commercial customers with a single point of contact for quality, cost effective, converged voice and data solutions.

ComSys recognizes the critical need for a solutions provider that combines leading edge technology with quality service and support, and, is committed to establishing lasting business relationships with their clients. The company's goal is maximum customer satisfaction through total customer service.

ComSys is one of a select few converged solution providers nationwide that qualify to be a Technology Assurance Group (TAG) member.

ComSys provides VoIP Telephone Systems, Hosted Phone Systems, Call Center Solutions, Video Solutions, Structured Cabling and Wiring to businesses throughout the Gainesville, Ocala, Lake City and Leesburg areas. Our National Services Network can support and deliver our full range of products and services almost anywhere in the United States.
